

We at Waterloo pride ourselves in our ability to meet customer requests - no matter how far from the norm that request may be!

A common request is for a reverse border, so that the flange is on the inside of the fixing wall. This is useful for situations where the product can be more easily installed from the inside of the building.

These are some examples of louvres designed and manufactured for customers in the past.

As with all of our products, if you do not see what you are looking for please contact head office.
