

NV Non-Vision Grilles

DESCRIPTION

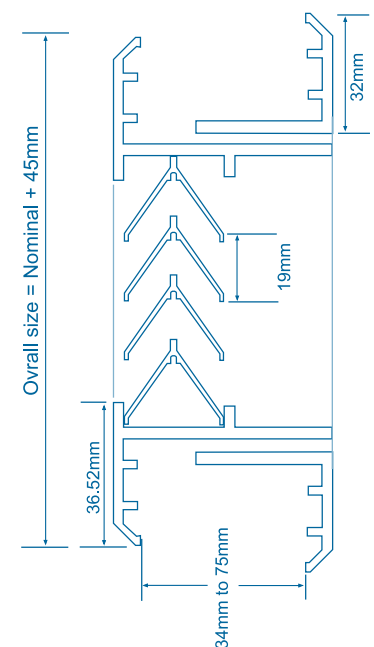

The *equal and approved* NV Non-Vision Grilles are constructed from aluminium extrusions with mitred and cleated corners. The NV range consists of an inverted 'v' chevron blade which makes them a "no sight grille". The NV grilles are supplied with a matching rear flange. NV grilles are supplied as standard in a satin anodised finish, others colours are available to order.

APPLICATION

Non vision transfer grilles are designed to be fitted into doors or partitions to allow air to pass from one area to another. The "no sight" characteristic of this grille makes it ideal where privacy is required.

BASIS OF PERFORMANCE DATA

(-) indicates a pressure drop of less than 5Pa or an NR of less than 10. Do not select grilles where a "x" is shown, these selections would give high pressure drops & NR levels.

AVAILABLE SIZES

The sizes detailed in the table above are for our standard range however other sizes can be manufactured to order.
